### Submarines and Deterrent

**We plan to invest around £35.8bn in submarines and our nuclear deterrent programmes over the next ten years.**

This covers all costs relating to the submarines themselves, nuclear propulsion costs and the costs of the strategic weapon system.

**This includes:**

- The completion of the remainder of the class of 7 Astute attack submarines;
- Design, development and production of the replacement for the Vanguard class ballistic missile submarines, assuming that Main Gate approval is obtained in 2016;
- The ongoing costs of managing and maintaining the strategic weapon system, both missiles and warheads;

# UNDERPINNING Britain's Economic Prosperity & Security

## SUCCESSOR

## DETERRENT

A new Successor submarine fleet underpins our economic prosperity and national security until well beyond the 2060's. It's a four boat fleet, guarding against all eventualities, day and night, operating at sea continuously. Representing British manufacturing excellence, it's made possible by around 1,200 companies located throughout the UK, employing 13,000 people. Successor is a catalyst for Britain's industrial and economic development from 2013 to 2030.
